

1.

The screenshot shows the Docker Desktop interface with a container named 'go-starterkit-postgres-1' running. The container is based on the 'postgres' image. The terminal shows the following SQL queries and results:

```
try_db=# select * from employee limit 10;
```

firstname	lastname	employee_id	hiredate	terminationdate	salary
Firstname000fa8fffc6b0158d344b43c38df661	Smith	1	2022-01-11 17:13:06.163752		36448

```
try_db=#
```

2.

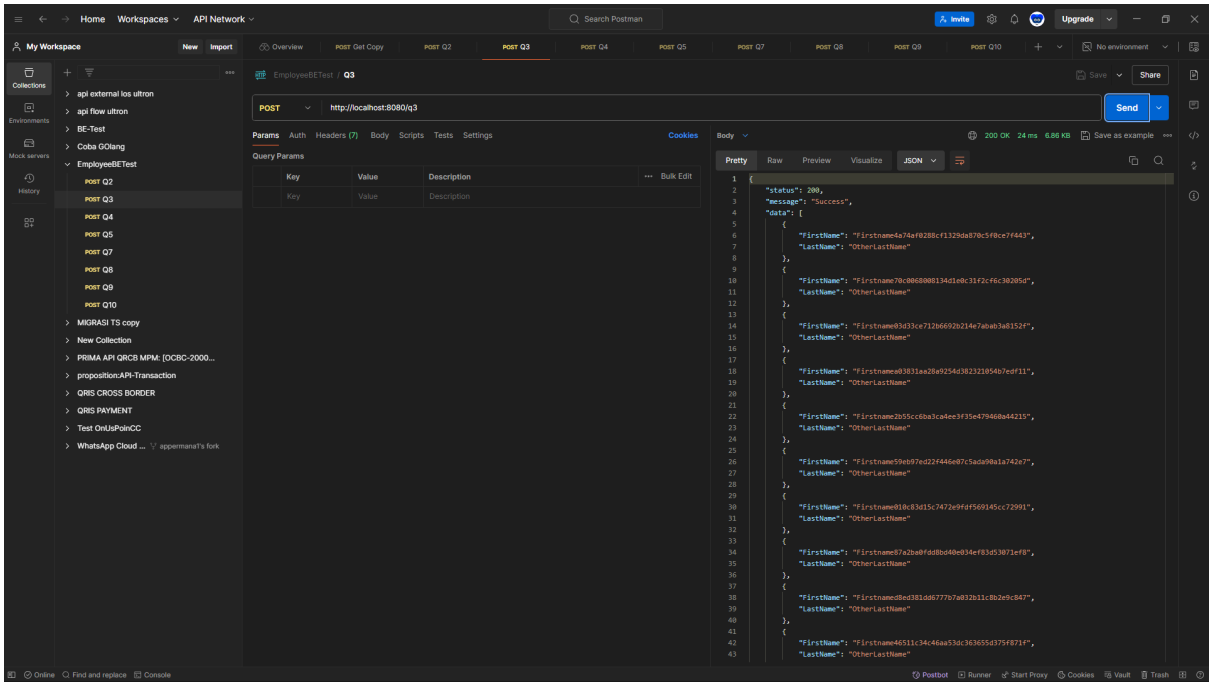

The screenshot shows the Postman interface with a REST client request. The request is a POST to `http://localhost:8080/q2`. The response is a JSON array of employee data, matching the data shown in the Docker Desktop terminal.

```
POST http://localhost:8080/q2
```

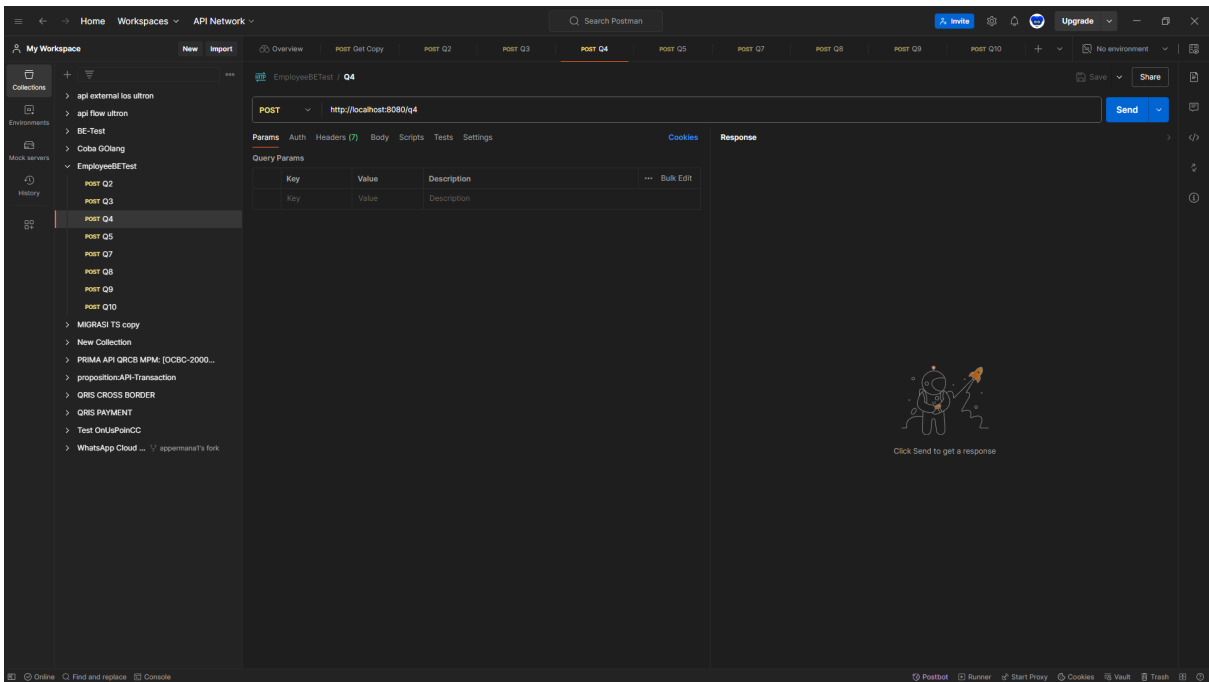

Body:

```
{
  "status": 200,
  "message": "Success",
  "data": [
    {
      "firstname": "Firstname000fa8fffc6b0158d344b43c38df661",
